Experience

Patriot Consulting
Senior Security Architect

2025

Serve as a trusted advisor for clients across a range of industries. Areas of focus include Microsoft Purview, including protecting Copilot and generative AI applications and agents.

Microsoft
Senior Cloud Solution Architect

2022 - 2025

As a Cloud Solution Architect, I served as a trusted advisor to strategic Health & Life Science customers, helping them realize the value of their Microsoft investments. Areas of focus include Purview, as well as Defender XDR and Entra.

- Security advisory to some of the most prominent healthcare providers in the world.
- Lead Data Security CSA for Health and Life Sciences, charged with advancing usage and increasing customer satisfaction with the Purview suite.
- Collaboration with Microsoft partners to support customers in overcoming implementation challenges.

Key Projects Include:

- Data Protection (DLP, Labeling), Data Governance (Retention, Disposition)
- Copilot and Generative AI Data Security Posture Management
- Insider Risk Management & Adaptive Access
- Large-scale identity and MFA migrations to Entra
- EDR migrations from CrowdStrike, Symantec
- Integration with third-party SIEMs such as Splunk & Chronicle

Catapult Systems
Senior Lead Consultant, Practice Technical Lead

2021 - 2022

Practice Technical Lead for the Spyglass Security Coach team, serving as a trusted advisor to clients across the entire landscape of Microsoft security and data protection technologies.

- Responsible for developing the security roadmap with each client, with a focus on maximizing the value of their Microsoft investment

Experience

Jones Day

2020 - 2021

Senior Engineer, Apps (Collaboration Solutions)

Joined the firm as a member of the Information Systems team, focusing on collaboration platforms.

- Areas of responsibility included Box and highly-secure file transfer systems for confidential attorney-client communications.

Kent State University

2019 - 2020

Senior Manager, Digital Platforms & Collaboration

Formed a new team, reporting directly to the CIO/CTO, dedicated to maximizing the University's investment in the Microsoft A5 suite.

- Responsible for the architecture, design, implementation and operation of technologies designed to further the digital transformation of the institution, including the complete Microsoft collaboration and security stacks, as well as Google Workspace.

Kent State University

2006 - 2019

Manager, Infrastructure Engineering/Client Infrastructure

Led a continually expanding team of Architects & Engineers responsible for technical architecture of the client computing, email and collaborative cloud-based platforms for the University.

- Managed the architectural design, implementation, and operation of Microsoft 365, Azure AD, and Google Workspace for 500k accounts.
- Management of the technical relationship and role-based IT services provided to 300+ field service staff and student employees across eight campuses.
- Implemented consolidated, centralized directory and systems management services (AD, SCCM, JAMF), as well as ancillary systems (Digital Signage, Print Fleet Management).

Kent State University

2003 - 2006

Systems Programmer, Client Services

Kent State University

2000 - 2003

LAN Administrator
